CURRENT RESEARCH

I am a lecturer at the School of Economics, University of Economics Ho Chi Minh City, and serve as a research fellow at both the Economy & Environment Partnership for Southeast Asia (EEPSEA) and EfD-Vietnam—part of the global Environment for Development (EfD) network. I earned my Ph.D. from the Graduate School of Environmental and Life Science at Okayama University, Japan. My research explores the intersections of rural transformation, agriculture, and environmental sustainability, with a recent focus on livelihood dynamics, land-use change in peri-urban areas, and the valuation of wetland ecosystems in Vietnam.
